## Chapter 6: Deploying and Monitoring Your Application

Tozo architecture

## Begin with a domain name. Build your website with Gandi.

Join Gandi and 350,000 users and specifiers.  
What is the ideal domain name for your project?

[Transfer your domain names >](#) [WHOIS >](#)

Chat with us

# Security

Edit your account and security settings, as well as third-party applications and authorizations.
