Chapter 07: Releasing an Application with Spring Boot

The screenshot shows a web browser window with the Docker Hub interface. The browser's address bar displays `hub.docker.com/repositories`. The Docker Hub header is blue with a search bar and navigation links: `Explore`, `Repositories`, `Organizations`, and `Help`. The user `gturnquist848` is logged in. Below the header, there is a search bar with `gturnquist848` and a dropdown arrow, and a `Create repository` button. The main content area shows a repository entry for `gturnquist848 / learning-spring-boot-3rd-edition-ch7`. The entry includes the text `Last pushed: 5 minutes ago`, a `Not Scanned` status, `0` stars, `0` downloads, and a `Public` visibility setting. A tip box below the repository entry states: `Tip: Not finding your repository? Try switching namespace via the top left dropdown.` At the bottom left, there is a green Docker logo. The browser's address bar at the very bottom shows the full URL: `https://hub.docker.com/repository/docker/gturnquist848/learning-spring-boot-3rd-edition-ch7`.

gturnquist848 / learning-spring-boot-3rd-edition-ch7
Last pushed: 5 minutes ago

Not Scanned ☆ 0 ↓ 0 Public

Tip: Not finding your repository? Try switching namespace via the top left dropdown.
